HDMI Active Optical Cable

HDMI Ultra-High-Definition Optical Link Cable

HDMI AOCs support high definition (1080p) and ultra-high definition (4K & 8K) videos, Deep Color (48-bit), 3D and multi-channel digital audio on a single cable. Standard passive high-speed HDMI cables cannot carry 4K video much further than 8 meters: utilizing fiber optics, these HDMI cables provide full signal integrity over a 100m distance and offer future-proof bandwidth for the next generation of video displays. The HDMI cable is stand-alone and does not require power; for the user the cable acts just like a passive plug-and-play HDMI cable.

FEATURES
- High-Speed Fiber Optics
- Ultra-High Definition 4K & 8K
- Deep Color (48-bit)
- Supports ARC
- Supports 3D Displays
- EMI/RFI resistant
- No Power Cord

APPLICATIONS (Sources)
- Computers
- Blu-ray/DVD
- Set-top Boxes
- Phones/Tablets
- Digital cameras

APPLICATIONS (Displays)
- AV Receivers
- TV Monitors
- Digital Signage
- Medical/Industrial

CABLE LENGTHS
- Any length up to 100 meters

CONNECTOR TYPES
- High-Speed HDMI
  - Standard: Type A
